

Lab Sheet 5: MongoDB Advanced commands

Branch/ Class: B.Tech/M.Tech

Date:

Faculty Name: Prof. S.Gopikrishnan

School: SCOPE

Student name:

Reg. no.:

1. Create table Employee details and insert the following values into the table

Important:

- The given table of values is just a sample. Similar to this you must insert unique details upto 10 documents.
- Few fields should not be available for some documents like skills in emp 101, designation in emp 102 etc
- Query and its out should be in the same screenshot. You can use multiple screens for one output.
- Each question must have separate screenshot
- All screenshot must have system date at the task bar

Id	Name	Age	Experience	Address	Salary
1	Ramesh	32	10	Ahmedabad	2000.00
2	Khilan	24	5	Delhi	1500.00
3	Kaushik	23	1	Kota	2000.00
4	Chaitali	24	2	Mumbai	6500.00
5	Hardik	27	7	Bhopal	8500.00
6	Komal	22	1		1500.00
7	Muffy	24	2	Indore	10000.00

use employeesdb.createCollection('employee_details')

and insert all the details into the collection

Execute the following queries

- Find the name and address who are getting salary Rs. 2000.00 or Rs. 1500.00
- Find the names of the Employee between the age 22 to 25 years.
- Find out the names of the Employees who do not get the salary of 10000.00.
- Find the names of the Employee between the age 22 to 25 years and who do not get the salary of 10000.00.
