

Lab Sheet 7: MonetDB Basics

Branch/ Class: B.Tech/M.Tech
Faculty Name: Prof. S.Gopikrishnan
Student name:

Date:
School: SCOPE
Reg. no.:

Important:

1. All table values should be changed. No same value should present in other lab sheet.
2. Need screenshot of all codes and outputs. No copy paste of code.
3. All screenshot should have date and time at the task bar.
4. Don use any AI tools to take the code.

1. Consider this table “employee” in schema “company”:

emp_id	dept_id	salary	emp_name	join_date
1	101	50000.00	Alice Johnson	2022-05-15
2	102	62000.50	Bob Smith	2021-11-20
3	101	45000.75	Charlie Brown	2023-01-10

1. Write a query to insert a new employee with values:
(dept_id=103, salary=70000.00, emp_name='David Clark', join_date='2023-09-01').
2. Write a query to select all employees who joined after 2022-01-01.
3. Write a query to update salary of employee 'Alice Johnson' to 55000.00.
4. Write a query to delete the employee whose emp_name = 'Charlie Brown'.
5. Write a query to find the average salary of employees in department 101.
6. Write a query to add a new column email VARCHAR(100) to the employees table.
7. Write a query to change the datatype of salary column from DECIMAL(10,2) to DECIMAL(12,2).
8. Write a query to drop the column dept_id from the employees table.
9. Write a query to set emp_id as the primary key of the employees table.
10. Write a query to create a two fields from name into first_name & last_name.

Lab Sheet 7: MonetDB Basics

Branch/ Class: B.Tech/M.Tech

Date:

Faculty Name: Prof. S.Gopikrishnan

School: SCOPE

Student name:

Reg. no.:

2. Consider the following table “product” in “sales” schema:

product_id	category_id	price	product_name	manufacture_date
1	201	1500.00	Laptop	2023-03-10
2	202	800.50	Smartphone	2022-11-05
3	201	300.75	Keyboard	2023-06-15

Solve the following questions using MonetDB:

1. Select all columns from the products table.
2. Select only the product_name and price of all products.
3. Select all products where price is greater than 1000.
4. Select product_id, product_name for products manufactured after 2023-01-01.
5. Select all products belonging to category 201.
6. Select distinct category_id values from the products table.
7. Select the product_name and price of the cheapest product.
8. Select the product_name and price of the most expensive product.
9. Select the product_name and manufacture_date of products sorted by manufacture_date in ascending order.
10. Select the product_name and price of products where product_name contains the word 'top'.
