

Lab Sheet 7: MonetDB Basics

Branch/ Class: B.Tech/M.Tech

Date:

Faculty Name: Prof. S.Gopikrishnan

School: SCOPE

Student name:

Reg. no.:

Important:

1. All table values should be changed. No same value should present in other lab sheet.
2. Need screenshot of all codes and outputs. No copy paste of code.
3. All screenshot should have date and time at the task bar.
4. Don use any AI tools to take the code.
5. Submit this lab sheet answers at: <https://forms.gle/YQubyg7PWccFpivWA>

1. Consider this table "staff" in schema "org":

staff_id	dept_code	salary	staff_name	hire_date
1	501	61500.00	Nisha Rao	2022-08-17
2	502	74250.50	Pradeep Menon	2021-12-11
3	501	48990.75	Farah Khan	2023-03-05

Insert all the values given values also insert your own 4 unique details

1. Insert a new staff member with values:
(dept_code=503, salary=80500.00, staff_name='Ritvik Sharma', hire_date='2023-10-01').
(auto/generate staff_id appropriately or specify the next number)
2. Select all staff who joined after 2022-01-01.
3. Update salary of 'Nisha Rao' to 63000.00.
4. Delete the staff row where staff_name = 'Farah Khan'.
5. Find the average salary of employees in department 501.
6. Add a new column email VARCHAR(100) to org.staff.
7. Change datatype of salary from DECIMAL(10,2) to DECIMAL(12,2).
8. Drop the column dept_code from org.staff.
9. Set staff_id as PRIMARY KEY for org.staff.
10. Split staff_name into two fields first_name and last_name (create a SELECT that projects both pieces using string functions).

2. Consider this table “device” in schema “store”:

device_id	category_id	price	device_name	manufacture_date
10	301	2499.99	Ultrabook	2024-02-18
11	302	999.50	ProPhone	2023-11-09
12	301	199.95	Mech Keyboard	2024-06-21

Insert all the values given values also insert your own 4 unique details

1. Select all columns from store.device.
2. Select only device_name and price for all rows.
3. Select all devices where price > 2000.
4. Select device_id, device_name for devices manufactured after 2024-01-01.
5. Select all devices belonging to category 301.
6. Select distinct category_id values from store.device.
7. Select the device_name and price of the cheapest device.
8. Select the device_name and price of the most expensive device.
9. Select device_name and manufacture_date of devices sorted by date ascending.
10. Select device_name and price of devices where device_name contains the substring 'pro'.
