

VIT-AP UNIVERSITY, ANDHRA PRADESH

Lab Sheet 8: Neo4j basic commands

Academic year: 2022-2023

Semester: Winter

Faculty Name: Prof. S.Gopikrishnan

Student name:

Branch/ Class: B.Tech/M.Tech

Date:

School: SCOPE

Reg. no.:

Neo4j – Basic commands

Create a graph database based on the following information:

Graph name: Research Network

Researchers:

Researcher Name	Institution	Country	Research	Relationship Name	Relationship With
Angelos Antonopoulos	Catalonia Technological Centre of Telecommunications	Spain	Machine Learning	Contributor	Machine Learning Journal
Joseph Camp	Southern Methodist University	United States	Computer Networks	Editor	Journal of Computer Networks
Claudia Campolo	University of Reggio Calabria	Italy	Machine Learning	Contributor	Machine Learning Journal
Berk Canberk	Istanbul Technical University	Turkey	Soft Computing	Editor	Journal of Soft Computing

Journals:

Journal Name	Country	Scope	Editor
Journal of Computer Networks	Spain	Computer Networks	Joseph Camp
Journal of Soft Computing	Italy	Soft Computing	Berk Canberk
Machine Learning Journal	India	Machine Learning	Joseph Camp

Update the created graph with the following information:

1. Update the editor name as “Claudia Campolo” for Machine Learning Journal and update the relationship using merge command

VIT-AP UNIVERSITY, ANDHRA PRADESH

Lab Sheet 8: Neo4j basic commands

Academic year: 2022-2023

Semester: Winter

Faculty Name: Prof. S.Gopikrishnan

Student name:

Branch/ Class: B.Tech/M.Tech

Date:

School: SCOPE

Reg. no.:

2. Create a path from “Angelos Antonopoulos” to “Claudia Campolo” through machine learning journal
3. Use merge command to create the following new nodes

John McLay	IIT-Delhi	India	Artificial Intelligence	Editor	Journal of Applied Intelligence
---------------	-----------	-------	----------------------------	--------	---------------------------------------

Journal of Applied Intelligence	India	Artificial Intelligence	John McLay
------------------------------------	-------	----------------------------	---------------

4. Set a new property “age” to all the researcher nodes and set default value as 50.
5. Remove the node “Joseph Camp”
